

Bio: *Dr. Michelle Swartz is a certified speech-language pathologist and an assistant professor at Stockton University. She earned her Ph.D. in 2022 from Montclair State University (MSU), following an M.A. in Speech-Language Pathology from MSU in 2014 and an M.S. in Biomedical Science from Barry University in 2009. Michelle specializes in the use of visual biofeedback for treating motor speech disorders, with a particular focus on childhood apraxia of speech. Her research explores how perception and social-emotional well-being influence treatment outcomes, aiming to improve therapeutic approaches and enhance the effectiveness of interventions for individuals with motor speech disorders.*
