Stockton University survey (<https://stockton.edu/news/2018/2nd-district-congressional-poll.html>).

Menendez's unfavorable rating is at 56%.

“This looks like bad news for Senator Menendez and good news for Bob Hugin, but keep in mind that the 2nd District is more rural and more moderate than most of New Jersey,” opined Michael W Klein, the interim executive director of Stockton's Hughes Center, referring to the state's southernmost, sprawling district taking in multiple counties including Atlantic, Cape May, Cumberland, and Salem counties as well as portions of Gloucester, Camden and Burlington counties, too.

Trump carried NJ02, a district with a substantial Hispanic population, by a comparatively narrower 50.6– 46.0% margin in 2016 while losing the state writ-large by about 13 points.

Today's released poll results were derived using a “likely” voter model with a margin of error of 3.5 percentage points.
