

Hughes Center Poll Finds Customers Give

whether patrons of such lounges should be able to also use alcohol or tobacco; 45% supported the current ban and 44% opposed it.

Alyssa Maurice, research associate for the Hughes Center, said the poll provided some

Men were more likely than women to have consumed weed, as 37% of men did compared to 28% of women.

People under 50 were more likely to have used cannabis in the past year, including 43% of 18- to 29-year-olds and 41% in the 30-49 age bracket. Only 17% of senior citizens said they consumed cannabis, with half buying it strictly for medical use.

Among various races and ethnicities, Blacks and African Americans had the highest usage (39%) followed by whites (33%), and Hispanics/Latinos (29%).

There were no differences in usage between different regions of the state and those with or without a college degree.
